

AMENDMENTS TO THE SPECIFICATION

Please amend the specification as follows:

Amend the paragraph beginning on page 5, line 13 as follows:

DISCLOSURE OF THE INVENTION

A mobile apparatus according to the present invention is a mobile apparatus comprising a broadcast receiving function for receiving a television broadcast and a telephone communication function for performing a telephone communication, wherein an audio output device comprising a left-channel audio output unit[[s]] and a right-channel audio output unit ~~of two systems, the audio output device outputting a television audio and a telephone received audio, and an audio processing circuit for outputting a left-channel signal of a the television audio using one of the to the left-channel audio output unit[s] and outputting a right-channel signal of the television audio to the right-channel audio output unit of the two systems and outputting the telephone received audio using the other audio output unit~~ when a telephone communication is not performed and the television is viewed and listened to, the audio processing circuit further generating a monaural television audio signal from the left-channel signal and the right-channel signal of the television audio, outputting a monaural television audio using one of the left-channel and right-channel audio output units and outputting a telephone-received audio using the other audio output unit in the case of performing the telephone communication while the television is continuously at the time of viewed / listened viewing / listening to the television, are provided.

Amend the paragraph beginning on page 5, line 19 as follows:

A setting means for setting which of the audio output units ~~of the two systems~~ is used for outputting the television audio and the telephone-received audio in the case of performing the telephone communication ~~while continuously~~ at the time of viewing / listening to the television, is preferably provided.

Amend the sentence beginning on page 5, line 24 as follows:

A sound volume ratio control means for controlling a ratio of sound volumes of the two audio output units ~~of the two systems~~ in the case of performing the telephone communication ~~while continuously~~ at the time of viewing / listening to the television, is preferably provided. Further, a setting means used by a user for setting the sound volume ratio is preferably provided.

Amend the paragraph beginning on page 6, line 11 as follows:

A display device for displaying a television image and a telephone-received image and a display control means for displaying both of the television image and the telephone-received image on the display device in the case of performing the telephone communication ~~while continuously~~ at the time of viewing / listening to the television, are preferably provided.
